To Whom It May Concern:

I would like to take this opportunity to recommend M.I.S. (Mobile Imaging and Scanning Solutions Inc) for any scanning work which you may have. January of this year M.I.S scanned various patient files for me that pertained to a legal matter . I saved time and money by having them scan the documents and create a simple data base so that the files could easily be retrieved by my lawyers.

Even though I am currently retired, if it became necessary, I would use M.I.S. again and recommend others in my field to do the same The quality of their product and the quick turnaround time impressed me.

I find all of the individuals who work for M.I.S. to be highly ethical and I felt secure in knowing my documents were treated in the utmost confidential manner.

Very Truly Yours

Blaise Frank Labriola MD OBGYN
